

R. A. PRAVEEN MALIKA WIJERATHNA

B.Sc. (Hons) in Mechanical & Process Engineering | University of Jaffna

📍 Monaragala, Sri Lanka 📞 +94 74 079 7588 ✉ Praveenmalika7@gmail.com

🌐 LinkedIn 🌐 Portfolio

Professional Summary

Graduate Mechanical Engineer with hands-on industrial experience in machine design, industrial automation, manufacturing improvement, and engineering project execution within a high-volume FMCG environment. Experienced in developing industrial equipment, supervising fabrication, coordinating equipment installation and commissioning, and implementing practical engineering solutions. Proficient in SolidWorks, PLC/HMI integration, engineering documentation, and cross functional collaboration, with a strong commitment to continuous improvement and operational excellence.

Education

B.Sc. (Hons) in Mechanical and Process Engineering

Apr 2022 – Jul 2026

University of Jaffna, Sri Lanka

Professional Experience

Automation & Machine Design Engineering Intern

Nov 2025 – May 2026

Hemas Consumer Brands – Dankotuwa, Sri Lanka

- Contributed to machine design, industrial automation, and manufacturing improvement projects while supervising outsourced fabrication activities.
- Designed mechanical components, developed 3D models and detailed engineering drawings, and prepared technical documentation.
- Conducted equipment installation, commissioning, and commercial production trials.
- Coordinated with Production, Quality Assurance, Research & Development, Safety, and external contractors throughout machine development and implementation.
- Applied 5S, Kaizen, FMEA, vibration analysis, and engineering documentation to support continuous improvement initiatives.

Engineering Projects

Semi-Automatic Shampoo Filling Machine Development | [Link](#)

Industrial Project | Hemas Consumer Brands

- Individually designed and developed a semi-automatic shampoo filling machine using SolidWorks, **currently operating in commercial production.**
- Designed the machine structure, product filling mechanism, bottle handling system, and supporting mechanical components.
- Designed and assembled the electrical control panel and configured Siemens PLC/HMI for machine operation and control.
- Applied CIP principles and coordinated fabrication, assembly, installation, and commissioning activities.
- Conducted commercial production trials with Production, QA, Safety, and R&D teams and implemented design improvements based on operational feedback.
- Prepared engineering and change control documentation and monitored machine performance during production.

Fully Automatic Shampoo Filling Machine Design | [Link](#)

Industrial Project | Hemas Consumer Brands

- Designed a fully automatic shampoo filling machine in SolidWorks, including the machine frame, bottle positioning, and filling mechanisms.

- Coordinated with an overseas equipment supplier to specify and select a variable-pitch system for the machine.

Cap Feeder and Elevator Machine Implementation | [Link](#)

Industrial Project | Hemas Consumer Brands

- Executed the installation and commissioning of an imported cap feeder & elevator machine.
- Designed and 3D printed interchangeable cap feeder mechanisms for different bottle types, ensuring accurate and reliable cap placement and conducted production trials.

Modelling, Development, and Performance Assessment of a Hybrid-Powered Thermoelectric Refrigerator | [Link](#)

Dec 2024 – Nov 2025

Undergraduate Research Project

- Developed a component level simulation model using MATLAB Simulink/Simscape to predict the thermal and electrical performance of a hybrid thermoelectric refrigeration system.
- Validated model accuracy against prototype test data using statistical analysis, establishing a reliable virtual testbed for design evaluation.
- Reduced reliance on repeated physical prototyping by leveraging the simulation environment to evaluate and optimize design alternatives.

Technical Skills

- **CAD & Engineering Software:** SolidWorks, EPLAN, MATLAB Simulink & Simscape, Microsoft Project
- **Industrial Automation:** Siemens PLC, Haiwell PLC, HMI Programming, Servo Drives, VFD Configuration, Pneumatic Systems
- **Mechanical Engineering:** Machine Design, Vibration Analysis, Root Cause Analysis, CIP System Design
- **Engineering Practices:** Engineering Documentation, 5S, Kaizen, FMEA

Professional Certifications

- **Lean Six Sigma Yellow Belt Certification** – LinkedIn Learning *Aug 2026*
- **Lean Six Sigma White Belt Certification** – Lean & Green Solutions Pvt. Ltd. *Oct 2024*

Leadership & Extracurricular Activities

- **Acting President** – Engineering Students' Union, University of Jaffna *Feb 2025 – Nov 2025*
- **Vice President** – Engineering Students' Union, University of Jaffna *Oct 2024 – Feb 2025*
- **Vice President** – Mechanical Engineering Society, University of Jaffna *2023 – 2024*
- **President** – Divisional Federation of Youth Clubs, Madulla Division, Sri Lanka Youth *2021 – 2022*

Awards & Achievements

- **Bronze Award – IESL Techno Exhibition (2023 & 2024):** Recognized by the Institution of Engineers Sri Lanka (IESL) for outstanding engineering projects; represented the University of Jaffna as Team Leader (2024) and Demonstrator (2023).
